

CIELO de Amor

November 2020

Learning language, motor and practical skills through personalized, joyful activities!

CIELO de Amor is facing recent challenges as we always do: by finding new ways to work, collaborate and grow!

Your support has made it possible for us to improve health protocols and restart direct services to the majority of the children and young adults we serve, adapting as we go.

We hope you'll join us in celebrating what we have achieved, and help us continue to thrive!

***P**risilla (left) and her family are thrilled. Up until receiving this wheelchair Priscilla had to either crawl on her hands and knees or be carried by her family. She can now move about in life-changing ways for the whole family!*

Join Us: Each One Reach One!

The majority of our generous donors give \$10-\$200 every month! Some give more! If you and all our donors each bring us just one new regular donor, we'll be able to:

- Provide supplies to repair and refurbish wheelchairs for over 100 current clients
- Provide materials for staff and young adults to sew masks in our vocational program
- Buy educational materials (paints, paper, markers) for classroom and home visits
- Establish a sustainable future for over 150 families and our eight local staff

As part of **Each One Reach One**, please share CIELO's story with a friend, colleague or family member and ask them to become a donor, like you.

Invite them to visit cielodeamor.org/contribute/ to set up a monthly or annual donation via PayPal or credit card. If they prefer to donate through their bank or directly by check, just email ruthie@cielodeamor.org

By the Numbers...

20 wheelchairs were refurbished & donated

7 children received their first wheelchair

50 clients received wheelchair repairs, adjustments or evaluations

8 young adults participated in vocational training

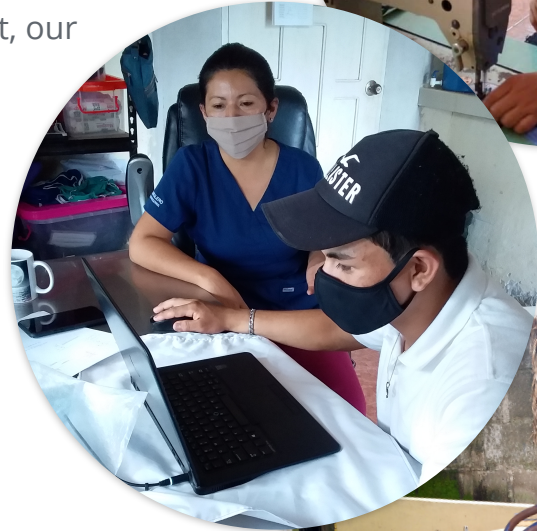

7 online training courses were completed by our staff, from leadership and business to a wheelchair course featuring a team of global presenters.

40 children received physical therapy or speech, communication and academic support.

Vocational Training Adapts!

With more one-on-one support, our young adults are learning to sew, clean and explore cooking and computer skills, filling needs that match their interests.

One of our young adults Deyvis (right) is learning how to assemble, repair and maintain wheelchairs. He is picking up new skills quickly, thanks to his prior experience with bicycles!

We continue to provide physical therapy and special education services at CIELO de Amor and in homes, and families are more involved!

Giancarlos walks with parallel bars built by his family (left). Helen teaches motor skills through play (right)!

**CIELO de Amor survives and thrives because of you!
For that we are tremendously grateful!**

– Ruth Weinberg and the CIELO de Amor Family
